

DATASHEET

MatrixStore Cloud is a media-focused cloud storage platform that gives you instant access to your content from anywhere, anytime you need it. The costs are low, with no hidden fees and no egress charges.

“MatrixStore Cloud revolutionises the way media companies can use cloud storage platforms”

Facts

- **MatrixStore Cloud is over 8x cheaper than public cloud**
- **MatrixStore Cloud could give you savings of up to £16m over 5 years***
- **MatrixStore Cloud will give you predictable costs, with fixed monthly/annual fees, and no additional penalties**
- **MatrixStore Cloud will give you instant and unlimited self-serve access to your content from anywhere at all times**
- **MatrixStore Cloud is simple to set up and use, no need for DevOps or consultants**

**Based on an active 10PB media library vs. alternative public offerings*

What is MatrixStore Cloud?

MatrixStore Cloud is a cloud storage platform that enables you to protect your archive, backup, and access your content from anywhere, at any time, using the most appropriate cloud solution designed for media workflows.

Far removed from the traditional cloud storage models that may have competitive upfront fees and unpredictable costs when you want to access or ensure the availability of your own data.

Your data is yours, and you should be able to access it whenever you want and as fast as you can, and you shouldn't be penalised for that.

MatrixStore Cloud enables you to do just exactly that, with an extremely competitive and predictable monthly fee and nothing more.

MatrixStore Cloud gives you instant access to your content at all times, for no extra cost, absolutely no egress, and all at comparable prices to low-cost archive platforms, including AWS Glacier.

With MatrixStore Cloud, you will have all of the benefits of public cloud storage, with many more additional benefits and without any of the penalties.

Why MatrixStore Cloud?

MatrixStore Cloud is the perfect cloud storage platform for media companies

- You will have unlimited instant access to your content at all times, from anywhere with interfaces that are easy to use
- It is a media-focused platform specifically designed for media companies and video workflows
- You will have dedicated media interfaces (Vision) with transcode/proxy gen, sub-clipping (optional), and time-based metadata that will enable you to easily search and find the content at the touch of a button
- It is an immediate access "AWS Glacier" alternative that is designed for media libraries and archives
- It is very secure and a far less expensive per TB stored than e.g., AWS S3
- It will protect and future-proof your metadata
- Data protection strategies, including keeping data at multiple locations that are built-in to limit downtime and to allow for business continuity
- It is a dedicated B2B service
- It offers internet connectivity out of the box and enables you to add dedicated fibre connectivity if required
- There is no commitment and just a 30-day cancellation period
- There are no hidden costs - no cost to access your data, no egress costs, that's right, no egress costs

How Do I Sign Up?

It's a very simple process:

- If it sounds good then either get in contact or visit the [Object Matrix website](#) to sign up
- You will receive a free 7-day trial and away you go!
- After 7 days the minimum requirement is 100TB+ per month
- If you want multi-cloud access, file acceleration or custom Vision skins just ask

“Finally my CFO will be pleased with an investment that brings strong ROI and long term predictable costs.”

If you are looking for the most cost-effective cloud storage platform that offers the most value and doesn't penalise you to access your data, then MatrixStore Cloud is the platform for you. Just sign up and give it a try.
